EXPERIMENT 05

Reports, dashboards and custom pages (Page Builder elements)

Aim

Build Service_Command_Center_Page using all eleven Page Builder elements and verify the numbers it shows.

Procedure

1. Create reports: Service_Request_Report, Active_Requests (Status not Delivered), Ready_For_Pickup, Delivered_Requests. Show useful columns only.
2. Create the page Service_Command_Center_Page. Add Command_Center_Main_Panel (Panel) as the outer container.
3. Top strip: Daily_Bay_Utilization_Gauge (Gauge), ServiceType_Distribution_Chart_Widget (Chart, pie), Vehicle_Owner_Search_Bar (Search on Reg No, Owner Name, Request ID).
4. Middle: Send_ReadyForPickup_Button (Button) above Service_Status_Board (Board) with columns mapped to Status values.
5. Lower: Full_Service_Requests_Report (Report); bottom strip Technician_And_SpareParts_Stock_Widgets (Widgets).
6. Sidebar: Service_Policy_Estimate_Snippet (Snippets), Insurance_Damage_Photo_Viewer (Viewer), Quick_Walkin_Service_Form (Form, expandable tab).
7. Test desktop and narrow layouts; check labels, contrast and date formats.

Implementation and verification

Element	Name	Check
Panel	Command_Center_Main_Panel	Wraps all sections
Board	Service_Status_Board	Drag changes Status
Chart	ServiceType_Distribution_Chart_Widget	Counts match report
Gauge	Daily_Bay_Utilization_Gauge	e.g. 6 of 8 bays
Search	Vehicle_Owner_Search_Bar	3 fields searched
Form	Quick_Walkin_Service_Form	Same validation as main form
Report	Full_Service_Requests_Report	Export for managers only
Snippets	Service_Policy_Estimate_Snippet	Edit once, reused everywhere
Button	Send_ReadyForPickup_Button	Only Ready for Pickup owners
Widgets	Technician_And_SpareParts_Stock_Widgets	Live availability and stock
Viewer	Insurance_Damage_Photo_Viewer	Shows latest upload

Evidence and testing

E05 (assignment deliverables): (a) full page in Page Builder with elements labelled, (b) Gauge and Chart with live sample data, (c) Board drag-and-drop before/after, (d) Viewer showing a sample insurance copy or damage photo. Cross-check every panel against its filtered report.

Application images and explanation

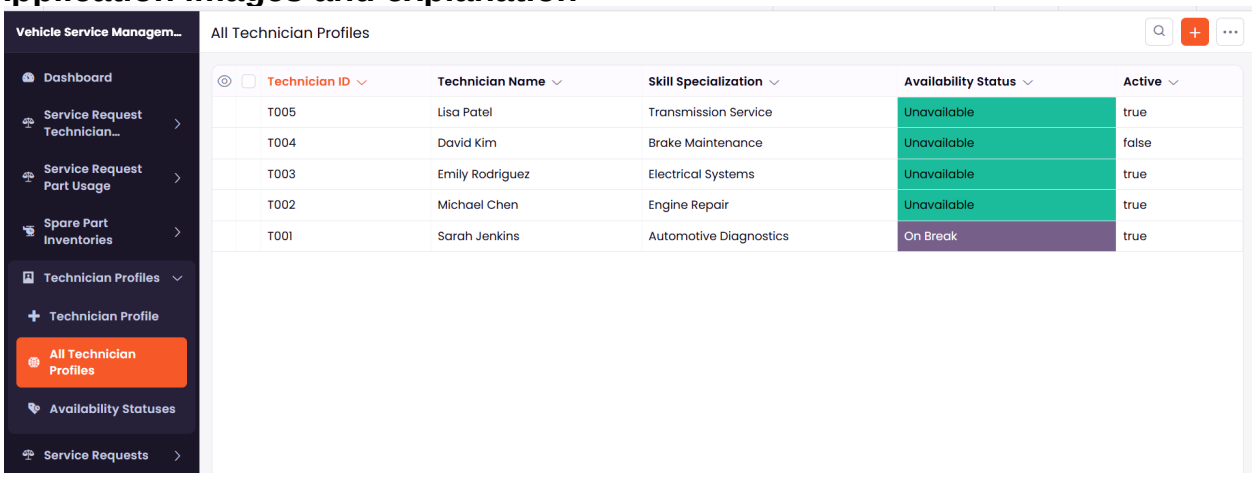

Figure 1: All Technician Profiles report (conditional colour on Availability Status)

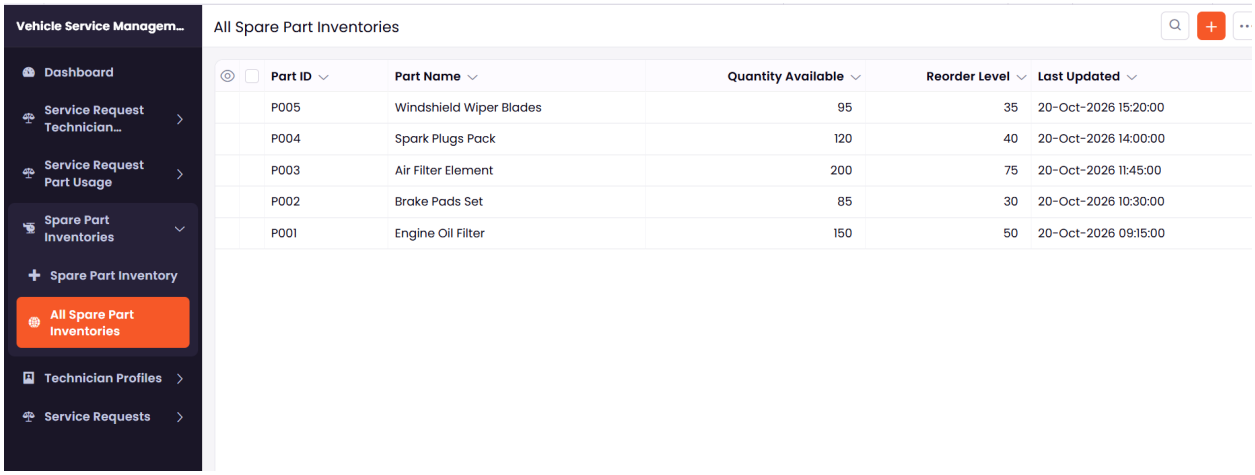

Figure 2: All Spare Part Inventories report

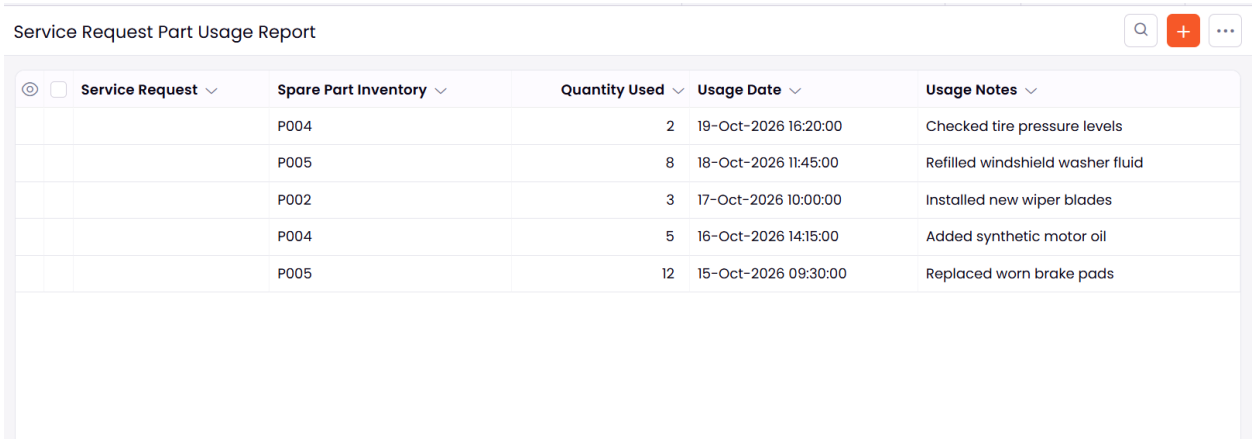

Figure 3: Service Request Part Usage Report

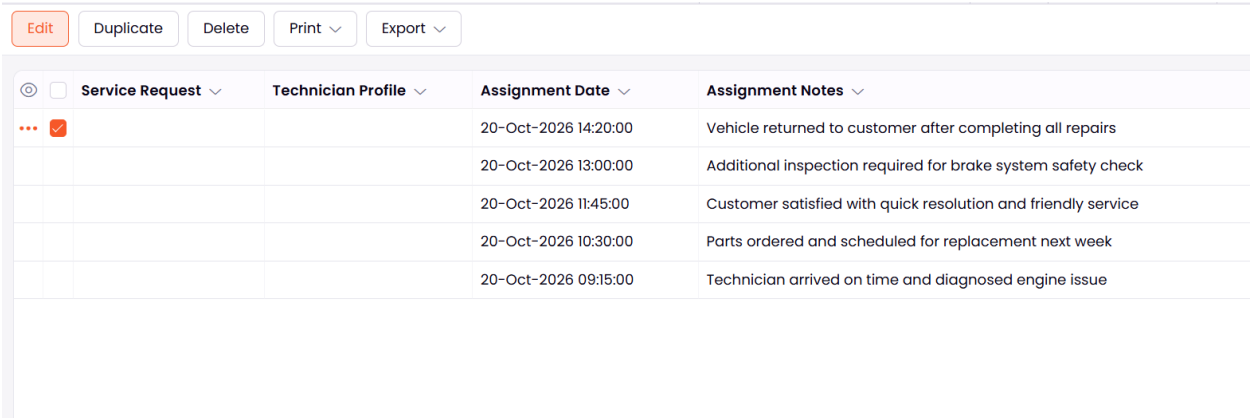

Figure 4: Service Request Technician Assignment report

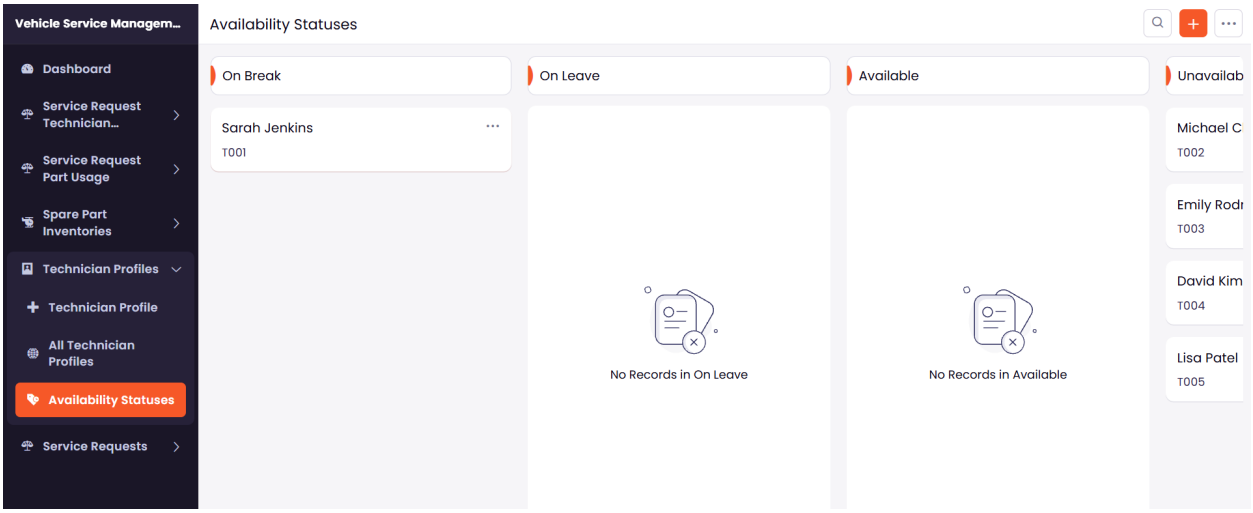

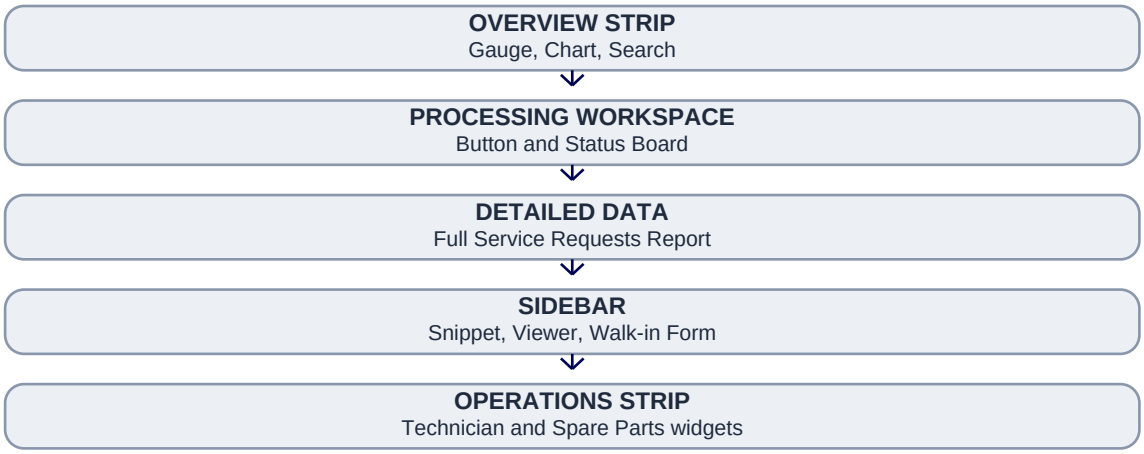

Figure 5: Availability Statuses Kanban view (a report-level view; not the Page Board element)

Process diagram

Generated explanatory diagram. It is not a screenshot of an executed workflow.

Result

Expected result and verification criteria. All eleven elements are present and working; panel counts reconcile with source reports; Board drag updates the record.
